## Profile

Experienced mobile developer (with over 6 years of experience in Android & iOS development). Adept at problem-solving, debugging, optimizing app performance, and continuously learning new technologies to stay ahead in mobile development. When I am not developing apps, I like to watch sci-fi-based TV shows and play cricket.

---

## WORK EXPERIENCE

### Senior Mobile Developer

Modus Create

07/2022 - Present

Remote, Pakistan

- Currently working as a mobile developer at Modus Create, an international organization headquartered in the United States.
- Responsible for the development of Alamo Drafthouse Android & iOS App, which has 300K+ downloads.
- Conduct code reviews, write new features, fix bugs, and prepare documentation.
- Implemented MVVM architecture and the coordinator pattern in the app.
- Converted 70% of screens and views to Jetpack Compose and SwiftUI, reducing crashes and improving app performance.
- Wrote Unit Tests to ensure app quality and stability, because of code refactor.
- Implemented Fastlane, which significantly reduces build upload time by 50%.
- Implemented ADA-compliant accessibility features for disabled persons.
- Utilized Firebase Remote config to push new changes to App without releasing it.
- Technologies: Kotlin, XML, Android Jetpack, Compose, Swift, UIKit, SwiftUI, MVVM-clean architecture, Coordinator Pattern.

### Mobile Developer

Buzzware Tech Private Limited

01/2021 - 07/2022

Islamabad, Pakistan

- Mobile Team Lead, responsible for managing a team of 3 Android and 2 iOS developers.
- Assigned tasks to the team, conducted code reviews, and prepared solutions, architecture, and design patterns for new features.
- Developed Smart Tracker Android and iOS app from scratch for Vodafone Qatar.
- Added device tracking and smart bulb functionality.
- Implemented live vehicle tracking using SignalR.
- Implemented push notifications, allowing users to keep track of their vehicles.
- Technologies: Kotlin, Android Jetpack, Compose, Swift, SwiftUI, VIPER architecture.

### Android & iOS Developer

Fiverr.com

11/2018 - 12/2020

Abbottabad, Pakistan

- Worked with over 40 clients on various small and large-scale Android and iOS projects.
  - Created Android version for Flikshop, which has over 50K downloads.
  - Created Android version for 'Military Money: Pay & Pension', which has over 10K downloads.
  - Updated UI design for Mamazen iOS app, which has over 10K downloads.
-

## EDUCATION

Bachelor of Software Engineering  
Comsats University Islamabad, Pakistan

2016 - 2020

---

## Skills

**Languages:** Swift, Kotlin, Java

**Frameworks & Architectures:** UIKit, SwiftUI, Jetpack Compose, MVVM, VIPER, MVC, Clean Architecture, LiveData, Flow, WorkManager, Kotlin Coroutines, RxJava, Retrofit, OkHttp, Hilt, Ktor, Android Jetpack, Cocoa Touch, CoreData, SwiftData, AVFoundation, ARKit, Combine, Swinject, URLSession, Alamofire, Fastlane.

**Practices:** SOLID, Design Patterns, API Integration, Unit Testing & UI Testing, Concurrency, CI/CD, Git, Agile mindset.

[Flikshop Android App](#)

[Mamazen iOS App](#)

[Overboard Solutions iPad App](#)

---

## Personal Projects

**Expense Tracker:** [Github Link](#) (Android)

Expense Tracker is a simple Android app written in Kotlin. I created this project to showcase my skill set in Android Jetpack components (MVVM architecture, Hilt, Navigation components, Coroutines, LiveData, ViewModel, and Room database).

**DMerAndroidApp:** [Github Link](#) (Android)

DMer is a simple Android app written in Kotlin. It fetches categories and images from Firebase and allows users to filter and share them.

**Android-VPN-Study:** [Github Link](#) (Android)

I created this VPN project to understand TCP, UDP packets. Written in Kotlin and Java.

**MoviesApp:** [Github Link](#) (iOS)

MoviesApp is a pet project where I implement new things as I learn, including the latest technologies introduced by Apple. (IMDB Rest API, Aysnc-Await, Actor, Custom Font, SwiftUI, Combine, Dependency injection).
